

## ENVIRONMENT, HEALTH AND SAFETY POLICY

We, at JA Jebel Ali Golf Resort, are committed to providing heartfelt hospitality to our guests in the best ecologically sound environment, where care has been taken by using sustainable products. We invite and encourage our guests to participate in our efforts to protect the environment, by providing information about our business and pointing out to them on how they can support our policy to reduce carbon imprints.

We seek to ensure, through our environmental initiatives, that business activities are environmentally sound and designed to operate in compliance with all applicable regulatory requirements to which the organization subscribes. It relates to its environmental aspects and their environmental performance is monitored to demonstrate continual improvement. We will perform our business activities with attention to the environmental issues which may have legal, financial, reputational and environmental implications.

JA Jebel Ali Golf Resort clearly establishes the principle that the environment, health and safety plan can be rejected on environmental grounds when a proposed job fails to address environmental, health and safety issues in a satisfactory way.

JA Jebel Ali Golf Resort supports a precautionary approach to the management and sustainable use of natural resources. It will ensure that its operations include measures to safeguard, and where possible, enhance natural habitats and biodiversity, in a pre-planned manner, by:

- Appropriate and efficient mitigation measures to comply with all legal regulatory requirements
- Conservation of natural resources, including water and energy
- Reducing waste through effective garbage disposal management
- Appropriate measures taken to evaluate and minimise pollution
- Sustainable purchasing
- Encouraging the preservation of flora and fauna
- Nurturing a responsible culture through our training programmes
- Analysing time-bound outcomes to ensure continual improvement

JA Jebel Ali Golf Resort will work with international agencies and other organisations in promoting co-ordinated approaches towards effective environment, health and safety interventions in the region, including the alleviation of severe environmental, health and safety problems.

JA Jebel Ali Golf Resort is committed to enabling dialogue with its stakeholders, governments, suppliers and business partners, other international institutions and civil society at large in-line with our environment, health and safety, quality and socio-cultural endeavours.

In its internal operations, JA Jebel Ali Golf Resort seeks to work with suppliers and sub-contractors who follow similarly high environmental standards.

In order to comply with its environmental mandate, policy, objectives and general principles, JA Jebel Ali Golf Resort pursues four strategic directions:

- Integrating environmental, socio-cultural, quality, health and safety issues considerations into the business cycle
- Promoting environmentally oriented investments across JA Jebel Ali Golf Resort
- Mainstreaming environmental considerations through JA Jebel Ali Golf Resort business strategies and technical co-operation activities
- Building partnerships to address regional and global environment, health and safety issues
